SUMMARY

Entry-level Software Engineer with strong fundamentals in programming, data structures, and backend development. Experienced in building REST APIs, debugging applications, and developing end-to-end Python projects. Passionate about problem-solving and writing clean, efficient code.

Projects

AI Resume Screening & Candidate Ranking System Using FastText (sep–Nov 2025)

[github](#) [🔗](#)

- Designed and implemented a Python-based resume parsing and ranking system using efficient text processing and scoring logic, exposed via REST APIs.
- Developed a robust data ingestion pipeline with PyPDF2 and an interactive Streamlit UI that reduced manual screening time by up to 30% and improved candidate selection, addressing the issue of nearly 50% of resumes lacking critical skill matches.
- Technologies: Streamlit, PyPDF2, Pandas, NumPy, Groq API, LLM, HTML/CSS (for report generation)

AI-CODE-DEBUG-ASSISTANT-TECHNOLOGY-STACK. (Dec–Jan 2025)

[github](#) [🔗](#)

- Developed a real-time AI-powered backend using FastAPI and Groq LLaMA 3.1.
- Implemented secure API key management and RESTful endpoints.
- Technologies used: Python, FastAPI, Groq Cloud API, LLaMA 3.1, Uvicorn, Swagger UI, REST API, VS Code, Git, and GitHub.

Parkinson's Disease Detection Using Machine Learning Support Vector Machine (Jan–March 2025)

[github](#) [🔗](#)

- Built SVM model achieving 92% accuracy, improving early disease detection reliability and reducing false positives
- Outperformed baseline deep learning models (DBN) by optimizing RBF kernel parameters, significantly improving classification performance and enabling early, non-invasive Parkinson's detection.
- Technologies: Python, SVM, Scikit-Learn, Pandas, NumPy, Matplotlib, Jupyter Notebook.

Data Analytics Simulations – Quantum & Commonwealth Bank Job simulation (Mar–Apr 2025)

- Analyzed business and transaction datasets using MS Excel to generate accurate reports and insights.
- Created Pivot Tables and applied Excel formulas to identify sales trends and customer patterns
- Ensured data accuracy through validation checks and supported business decision-making
- Technologies used: Python, Excel, R, Pandas, NumPy, Matplotlib, Seaborn, A/B Testing, Uplift Modeling, ETL Pipelines, APIs, GitHub

Internships

Project Associate(Data Analytics) - Ibroad solutions

March 2025 - Dec 2025

- Assisted in data validation and reporting using MS Excel to ensure accuracy
- Created and maintained spreadsheets for tracking and analysis
- Supported dashboard testing and documentation of data processes
- Identified trends and inconsistencies in data to improve reporting quality

Achievements and Certifications

SAP Certified - SAP Generative AI Developer
Salesforce Certified - Salesforce Agentforce Specialist
Certified from Smart interviews in Data Structures and Algorithms
Cyber security virtual internship(10 weeks)

Education

Vignana Bharathi Institute Of Technology
B.Tech in Electronics communications and engineering

(Nov 2021- Mar 2025)

Skills

Programming Scripting: Python, SQL, Java, Problem solving, Data structures

Visualization & Reporting: Tableau, Power BI, MS Office tools

Databases & Cloud: MySQL

AI/ML Tools: Pandas, FastText,

Version Control & Deployment: Git, GitHub, Streamlit

Backend Concepts: OOP, Exception Handling, Collections, JDBC

Concepts: REST APIs, MVC, Debugging, Deployment Basics
